OBJECTIVE

Motivated 4th-semester Computer Science student at SMIT seeking a software/cybersecurity internship. Eager to apply hands-on project experience in Python, web development, and DSA to contribute meaningfully to a real-world team.

TECHNICAL SKILLS

Languages
Python, C, C++, JavaScript, SQL, PHP, HTML

Web Dev
HTML5, CSS3, JS, React (basic), Node.js (basic)

CS Fundamentals
DSA in C (completed), OOP, OS basics

Competitive
LeetCode (active), HackerOne

Cybersecurity
Network Security, Phishing Awareness, IDS

Tools
Git, GitHub, VS Code, Linux, Arduino IDE, MATLAB (basics)

CV / ML (basics)
MediaPipe, OpenCV (Python)

IOT
ESP, Arduino, Sensor

EDUCATION

PROJECTS

Full-Stack Blogging Platform
Python • Django • HTML/CSS • JS

- Built a multi-user blogging web application where users can register, log in, create, edit, and publish blog posts.
- Implemented secure user authentication with session management and role-based access control.
- Designed a responsive front-end interface and integrated a relational database for persistent content storage.
- Deployed a fully functional CRUD system enabling seamless content management for all registered users.

Shortest Path Finder
Python / C • Graphs • DSA

- Developed a graph-based application implementing Dijkstra's and BFS/DFS algorithms to compute shortest paths between nodes.
- Visualized graph traversal step-by-step, making the algorithm's logic transparent and educational.
- Applied core DSA concepts including adjacency lists, priority queues, and dynamic programming for optimization.

Finger Movement Counter & Air Drawing
Python • OpenCV • MediaPipe

- Built a real-time computer vision application using MediaPipe hand-tracking to detect and count finger movements via webcam.
- Implemented an air-drawing feature allowing users to draw on screen by moving their index finger in the camera frame.
- Processed live video feeds with OpenCV to extract hand landmarks and map gesture states to on-screen actions.

Other Mini Projects

- Portfolio website (HTML, CSS, JS) — showcasing personal work and skills.
- CLI task manager in C using linked lists and file I/O, applying core DSA skills.
- IOT enable smart class system.
- Smart Home Automation.
- Various Python automation scripts and utility tools for everyday problem-solving.

PROBLEM SOLVING & DSA

BSc. Computer Science
SMIT, Sikkim, India
4th Sem • CGPA: 7.2 • Expected Jan 2027

High School Diploma
National Examination Board
Damak, Nepal • Nov 2024 • GPA: 2.75

LANGUAGES

Nepali — *Native*

Hindi — *Full Professional*

English — *Professional Working*

INTERESTS

- Competitive Programming
- Problem solving
- Learning New Technology
- Cybersecurity Research
- IoT Projects
- Android App Development
- Open-Source Contribution

- Completed a comprehensive Data Structures & Algorithms (DSA) course implemented in C — covering arrays, linked lists, stacks, queues, trees, graphs, sorting, and searching algorithms.
- Actively solving problems on LeetCode with focus on arrays, strings, recursion, and graph problems.
- Strong foundation in algorithmic thinking, time/space complexity analysis, and writing optimized code.

ACADEMIC & VOLUNTEER EXPERIENCE

Programming Skill Certification – HackerRank

- Completed **Problem Solving (Basic)** certification demonstrating understanding of algorithms and coding logic.

IoT Enabled Smart Delivery Robot *(PBL Project – Ongoing)*

- Developing a **smart delivery robot using ESP32, motors, and motor driver**.
- Implementing **IoT-based control to operate the robot remotely through a mobile device**.
- Integrating **wheels, battery system, and wireless communication** for movement and control.
- Designed to **automatically deliver small items within a classroom or campus environment**.
